

EDUCATION

Chitkara University  
BE CSE - AI

Punjab, India  
Aug 2023 - June 2027

SKILLS SUMMARY

- Languages: Python, C, CPP, Java, Javascript, Typescript
- Frontend: ReactJs, ViteJs, NextJs, TailwindCSS, SCSS, Bootstrap, GSAP, Framer Motion
- Backend: NodeJs, ExpressJs, FireBase, PrismaORM, Cloudinary, DrizzleORM, Redis,
- Database: MySQL, PostgreSQL, MongoDB
- DevOps/Other: Git, GitHub, Docker, Notion, Nginx

WORK EXPERIENCE

- Fullstack Developer Intern | The Brain Burners Media** Jan 25- Present
- Led teams on multiple full-stack projects, collaborated with cross-functional teams, and contributed to scalable web applications by ensuring code quality ,efficient development and deployment.
- Technical Team Member | IEEE-CIET** Sept 24- Present
- Leading development of IEEE-CIET's official website using Next.js and modern web technologies and Collaborating with team members to organize technical workshops and events
- Web Team Member | Open Source Chandigarh** Sept 24- Present
- Collaborating with team members on various web development initiatives and Participating in community events.

PROJECTS

- Skillzy | A Platform for Freelancers** [LINK](#) Jan 25 - Mar 25
- Developed a full-stack freelance marketplace using Next.js, TailwindCSS, and MongoDB, enabling seamless employer and freelancer interactions and ensure smooth user navigation across 10+ pages.
  - Implemented secure authentication with email verification, role-based access control, optimized backend performance ensuring 99.9% uptime for a smooth user experience.
  - Integrated Gemini AI for dynamic skill verification, generating new medium and hard-level questions based on a freelancer’s skill set to ensure continuous assessment and improvement.
- HackWithHer Website | [LINK](#)** Oct 24- Dec 2024
- Developed a responsive and interactive website for a national-level hackathon with 3000+ participants, using Next.js and Material-UI to deliver a 99.9% uptime and ensure smooth user navigation across 10+ pages.
  - Integrated MongoDB for efficient data management, handling 1000+ database transactions seamlessly to securely store participant information, event schedules, and project submissions.
  - Implemented Cloudinary for media management, optimizing 500+ document and presentation uploads, reducing load times by 40%, and enhancing overall website performance.
- Social Media Analytics - Neural Nitwits | [LINK](#)** Jan 25
- Developed a full-stack application using Langflow and DataStax Astra DB for content engagement analysis with an intuitive interface.
  - Implemented an AI-powered chatbot interface for natural language data querying and insights extraction
- LogoGenix | [LINK](#)** Nov 24- Dec 24
- Built an AI-powered logo generation platform integrating Hugging Face's Flux-Midjourney-Mix2-LoRA model and Gemini API
  - Implemented user authentication using Clerk and real-time data management with Convex database

ACHIEVEMENTS

- Created and published 4 developer-focused NPM packages (complete-auth-system, mern-vite-shadcn-template, vite-tailwind-starter, and vite-shadcn-starter) that have garnered over 1000+ combined downloads.
- SIH College Level Round Qualifiers 2023.
- Finalists HackIndia Web3 Hackathon .
